

Liscarrol NS, Mallow, Co. Cork

change in particular.

Liscarrol NS has been working on the new theme of European and Global Citizenship since October 2010. All the pupils in the school conducted a survey on attitudes and behaviour late October. The results indicated that awareness on global food production, the European Union and developing countries in general was quite low. The committee in Liscarrol NS decided to involve the whole school in their work on the new theme. All the classes did various projects on these topics. Sixth class pupils wrote fantastic projects about poverty in developing countries and the links of poverty to the environment, climate

Third and Fourth class researched collected wrappers, wrote and created information walls/corners in and on the Green-Schools notice board.

Fairtrade. They performed raps, their classrooms

Senior Infants and First class pupils did water. They learned all about water in this compares to water in Ireland, through Trocaire's resource pack, Maji. They have a great understanding of how we can help by conserving water every day in our own lives.

projects on world Kenya, and how

Second and third class pupils created an information wall about poverty in the world. They collated all the information they found and tried to come up with ideas on what they could do to help others in the world. Switching off the light to reduce Climate Change helps, they discovered ☺ !

All in all the work that has been going on in Liscarrol NS has been fantastic and we are all looking forward to seeing the results of their awareness survey at the end of the school year, everyone learned so much!
